

Perrish the thought of allowing cell phone use inflt on airplanes. We don't need another distraction on board. We as flt attndnts have enough to deal with as it is, ensuring the safe passage for all those onboard. During taxi is adequate "privilage". If this idea becomes a reality, we give up further control over circumstances, in regard to vigilance, as well as EVERYONES safety. Truly, Judy Biegel, SFOSW, 32years experience,same airline.
